

Repstor  
Mobile:  
intuitive,  
accurate filing  
on the go

With improved mobile connectivity, and more convenient sized mobile devices, today's information workers are doing a lot more with their business email on the go. But unless team members correctly file messages and attachments at the time, they are creating more work for themselves. When they get back to the office, they will need to remember to go back and find the content again so they can file it to the right repository.

Most mobile email applications are not integrated with content repositories, which means there is no way for workers to file the latest email threads or attachments when out of the office. Their best bet for sharing content with co-workers has been to forward messages, adding to email volumes and version complexity until now.

Repstor Mobile enables intuitive, accurate email and attachment filing from a mobile device – to SharePoint, M-Files, Box and other repositories of choice.

Repstor Mobile eliminates the need for filing when employees return to their desks. It means everyone working on a project or case can be sure they are looking at the latest, correct information, wherever they are.

## Stand out benefits

-  Makes filing emails & attachments from any mobile device easy, intuitive and compliant
-  Multi-mobile platform, multi-repository support (iOS , Android etc)
-  Easy configuration options – for different project/case/legal matter types, user profiles, etc
-  Boosts ECM payback, as users default to storing and accessing all content there
-  Available stand alone or as a companion for Repstor affinity™
-  The quick-filing aid works directly in the Outlook app
-  Behind a very clean and quick user experience is a powerful and very flexible capture engine, to support the filing of emails at scale (Behind the scenes, the modern Microsoft Azure architecture for email capture and filing is very, very fast. This avoids the common scenario with mobile email workarounds, which use folder mapping and create a big queue of emails to file)

### About Repstor

Repstor, headquartered in Belfast and ranked in the Top 10 Deloitte Fast 50 companies, provides affordable, easy-to-deploy solutions that transform how information workers access, store and manage content wherever they are. By making this very intuitive, and harnessing tools that people use every day, we increase organizations' return on existing investments in file share and content management repositories.

Our world-class suite of products breathe new life into platforms including SharePoint, M-Files, Microfocus Content Manager, Opentext eDocs, Dropbox, Box, iManage Work®, Meridio, HighQ, and Dynamics CRM - making them the default repositories for project/case management and legal matter management, all managed from teams' familiar Office 365/Outlook environment.

Our products underpin the success of organizations ranging from Eversheds Sutherland, gunnercooke, ForFarmers, Pentland Brands, Value Retail , Boels Zanders Advocaten and Brose Group.

## What our customers are saying:

*"Everyone is very happy. Collaboration is very good, there's improved visibility of where things are and what is happening, and people are working well and retrieving case related content easily."*
